

MAN'S EVOLUTION

This magnificent piece of sculpture is made of stainless steel and stands 10½ feet high in the living room of the home of its designer, Mrs. Blake Robertson, Niagara River Parkway. The base represents the earth, then comes the symbols for man and woman, followed by curiosity, achievement and the universe. Mrs. Robertson started on the piece six months ago and the finished product will be exhibited in the Toronto art gallery early in March. Technical assistance was provided by Tony Morganelli, of the Niagara Sheet Metal Co., and Oneida Ltd. It weighs some 50 pounds and has \$200 worth of steel in it. Mrs. Robertson said the work is for sale but, before it is sold, she hopes to exhibit it in the United States. (Review photo by Roels)
