

Quality is not expensive — it's priceless

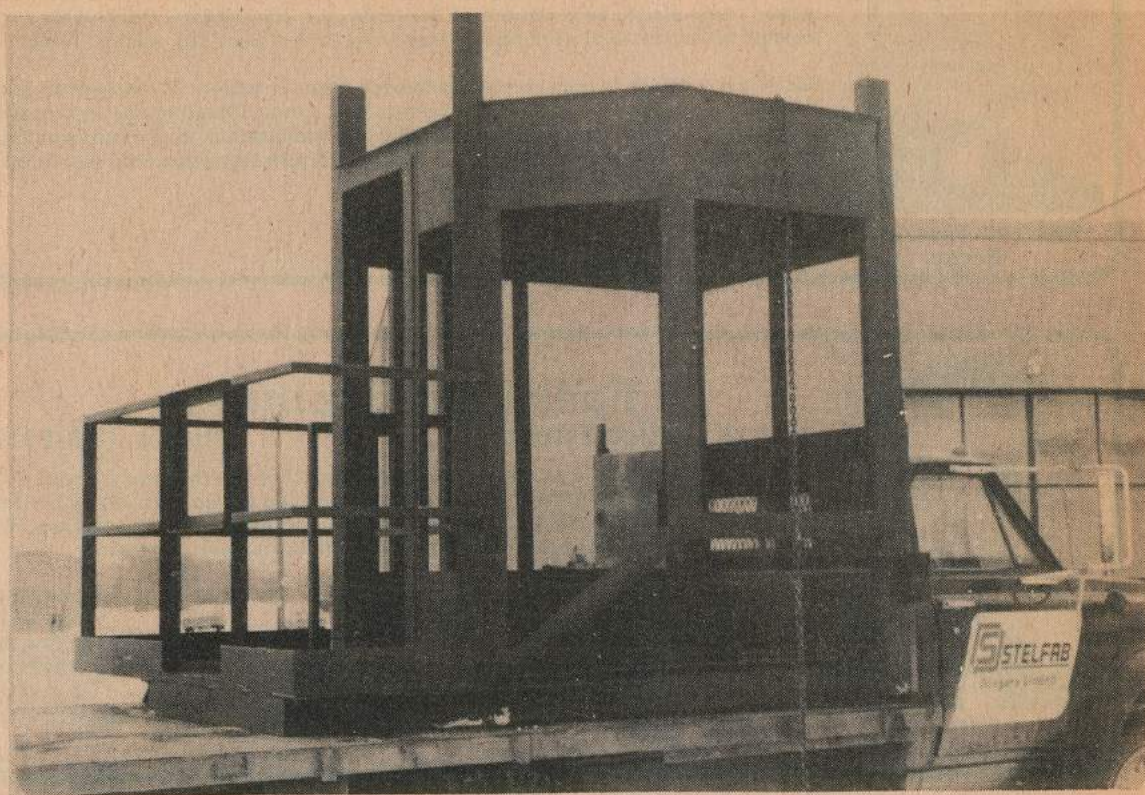

"Man's Evolution"
Designed by Hele Robertson
Constructed by Stelfab
Erected in Niagara Falls Public Library

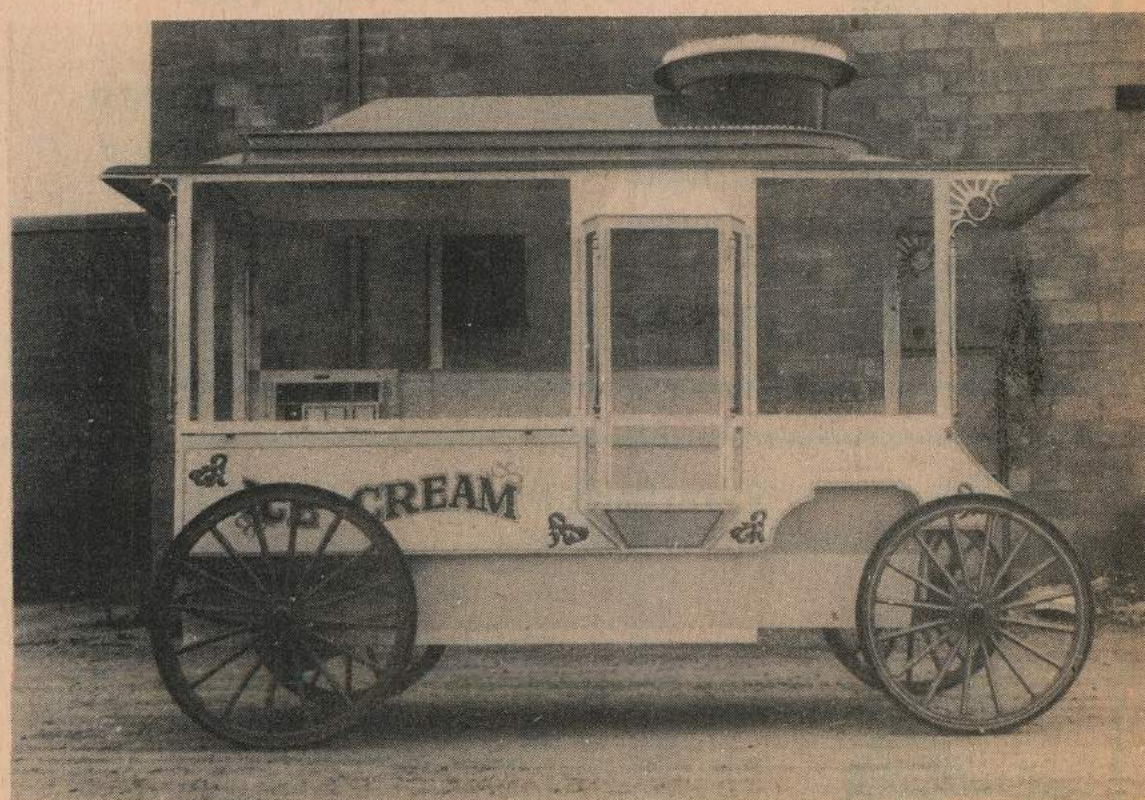

Major Hill's
river craft

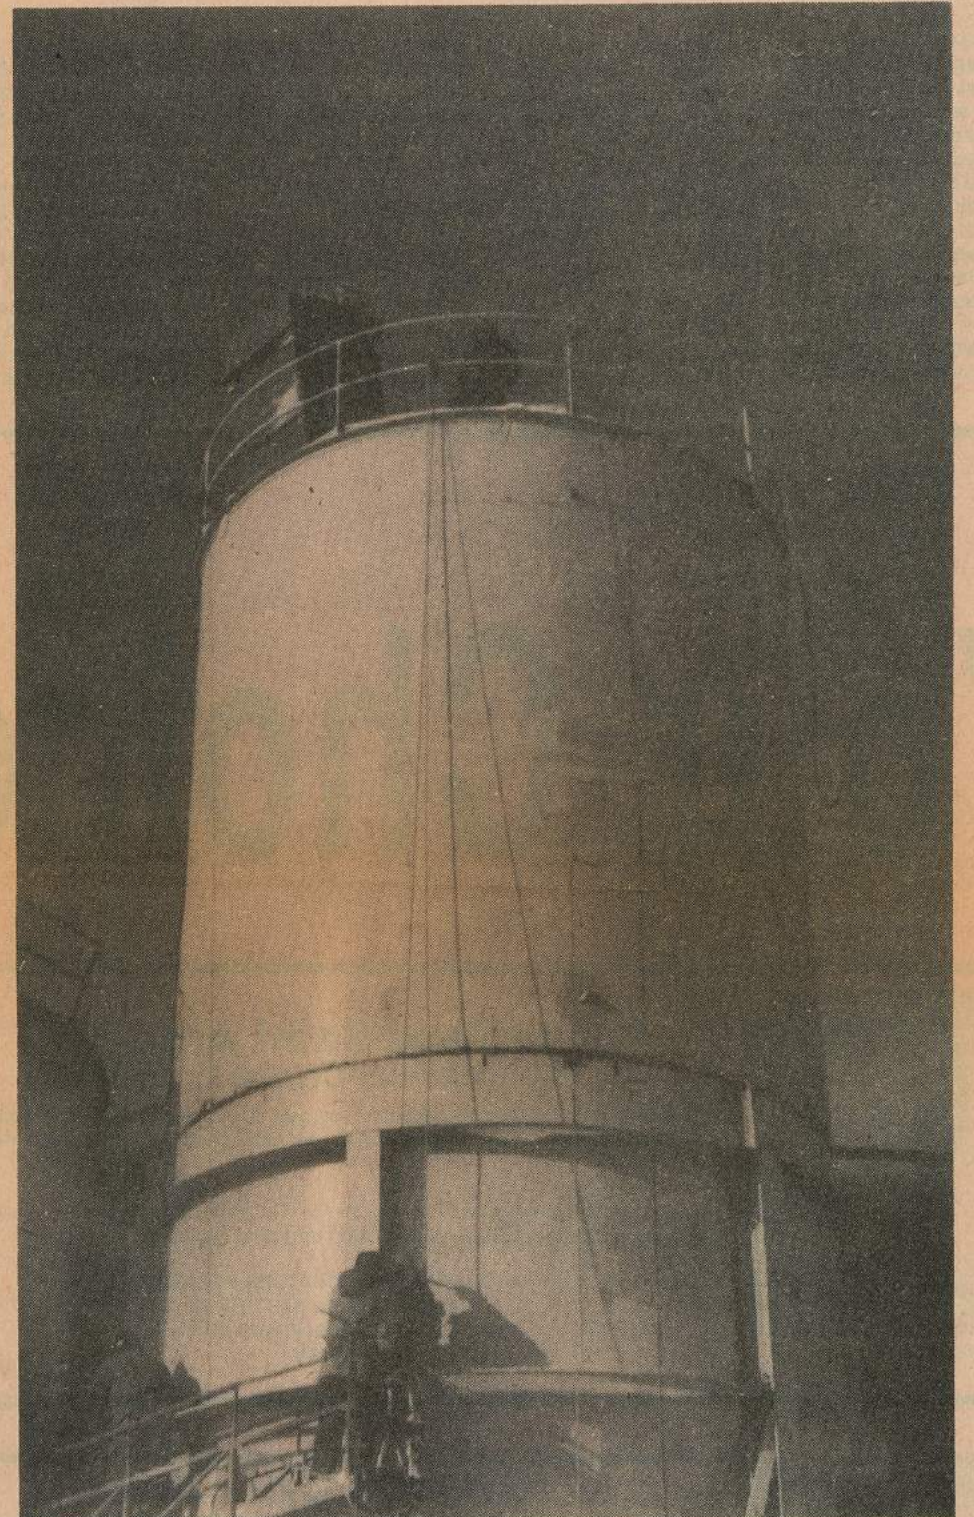

Container shipment for export

Crane cab

Ice cream wagon

Storage tank

**In step with progress
since 1972**

Since the beginning, Stelfab has been built on the idea of diversification. The company has accepted the challenge of fabricating metal from the most intricate and unusual designs to the heavy industrial structures.

Truly, the past thirteen years at Stelfab have been challenging and productive. Increased demand for quality custom steel and metal fabrication in the industrial complex of Niagara and in foreign markets has continued to stimulate production. Stelfab views the years ahead with confidence and optimism.
